PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience leading modernization initiatives across 4 production fintech platforms handling real financial transactions. Successfully converted from consulting engagement to direct-hire after leading client-facing delivery initiatives at IFD Technologies. Proficient in React, Angular, Vue.js, and TypeScript on the frontend, with solid backend exposure in Laravel, Node.js, and GraphQL. Owned full project lifecycles from client kickoff to production deployment. Academic background from ESCOM-IPN with a peer-reviewed publication at HCI International 2025. Bilingual Spanish/English (C1), experienced collaborating with distributed international teams.

TECHNICAL SKILLS

Frontend: React.js, Angular, Vue.js, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, TailwindCSS

State Management: Vuex, Pinia

UI Libraries: PrimeNG, Design Systems, Component Libraries

Backend: Node.js, Laravel (PHP), Python, Java, C#, REST APIs, GraphQL

Databases: SQL Server, MySQL

Cloud & DevOps: Microsoft Azure, AWS, Docker, Git, GitHub, CI/CD, SSH, Linux

Methodologies: Agile, Scrum, Code Review, Continuous Delivery

Testing: Jest | Languages: Spanish (Native), English (C1 - Advanced)

DOMAINS

Fintech - Payments - SaaS - Government Systems - Enterprise Applications

PROFESSIONAL EXPERIENCE

Full-Stack Engineer - OM Payments / Grupo Cumulus

Mexico City | Apr 2026 - Present (hired directly from client engagement at IFD Technologies)

- Led the modernization of 4 production fintech platforms by centralizing component configuration and standardizing UI patterns, reducing maintenance overhead and accelerating feature delivery.
- Rebuilt payment platform interfaces from desktop-centric applications into fully responsive experiences across mobile, tablet, and desktop devices.
- Worked directly with business stakeholders to define requirements, prioritize enhancements, and deliver customer-facing features.
- Established reusable UI standards and shared component practices across multiple fintech products, improving consistency and long-term maintainability.

Stack: Angular, TypeScript, SCSS, PrimeNG, Design Systems, SQL Server, Azure

Full-Stack Engineer - IFD Technologies Inc.

Remote | Oct 2025 - Apr 2026

- Owned a client engagement end-to-end, leading requirements gathering, architecture decisions, development, testing, and production delivery.
- Delivered projects across 5 simultaneous client accounts while adapting to changing business priorities and tight delivery timelines.
- Served as the primary technical point of contact for clients, translating complex technical decisions into clear business outcomes.
- Participated in client kickoffs, sprint reviews, roadmap discussions, and feature-scoping sessions with cross-functional teams.

Stack: React, TailwindCSS, Laravel, REST APIs, GraphQL, Docker, AWS

Software Engineer - Cantilever

Mexico City | Apr 2024 - Oct 2025

- Introduced unit testing (Jest) into a legacy Vue 2 codebase beyond LTS support, improving reliability for utility billing and meter-reading workflows.
- Developed and maintained frontend features supporting operational systems used by Mexico's national electric utility (CFE).
- Delivered software under strict public-sector procurement deadlines while maintaining application stability and data integrity.
- Co-authored ICE Management 2.0, officially registered with INDAUTOR (Reg. No. 03-2025-112411030100-01).

Stack: Vue.js, Nuxt, Vuex, GraphQL, Docker, AWS, Jest, SSH

Junior Developer - Teleurban

Mexico City | Jul 2022 - Apr 2024

- Developed and maintained internal business applications supporting operational processes across multiple departments.
- Implemented new features, bug fixes, and system enhancements in collaboration with senior engineers.
- Participated in software maintenance, debugging, and production support activities across several internal platforms.
- Gained hands-on experience across multiple backend technologies including Python, Java, C#, and PHP in a production environment.

Stack: Python, C#, Java, PHP

PROJECTS & PORTFOLIO

Portfolio includes a full-stack inventory and logistics management system with responsive UI/UX, plus selected engineering projects.

luis-sosa-portfolio.vercel.app

SELECTED ACHIEVEMENTS

- Successfully converted from consulting engagement to direct-hire after leading client-facing delivery at IFD Technologies
- Co-author of INDAUTOR-registered software - ICE Management 2.0 - Reg. 03-2025-112411030100-01
- Peer-reviewed publication - HCI International 2025 - International Journal of Human-Computer Interaction - Computer Vision System for Missing Pet Identification
- Led modernization of 4 production fintech platforms handling real financial transactions

EDUCATION

B.Sc. in Computer Systems Engineering - Escuela Superior de Computo (ESCOM), IPN - 2018 - 2024
