PROFESSIONAL SUMMARY

Computer Systems Engineer with three years of experience designing, building, and maintaining full-stack web applications using Vue.js, Nuxt, React, Angular, and Laravel. Proven ability to deliver production-ready features under tight deadlines within Agile (Scrum) teams. Co-author of a peer-reviewed publication presented at HCI International 2025 and published in the International Journal of Human-Computer Interaction. C1-level English proficiency and experience collaborating with multidisciplinary, international teams.

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt, React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3.

Backend: Node.js, Python, Java, C#, .NET, PHP (Laravel), Go.

Databases: MySQL, SQL Server.

Cloud & DevOps: Microsoft Azure, Amazon Web Services (AWS), Docker, Git, GitHub, Linux, SSH.

Tools & Methodologies: VSCode, Postman, Agile / Scrum, Code Review, Continuous Delivery.

Languages: Spanish (Native), English (C1 – Advanced).

PROFESSIONAL EXPERIENCE

IFD Tech — Full-Stack Developer

Remote | 2025 – 2026

- Designed and delivered full-stack web applications leveraging React on the frontend and Laravel on the backend to support core business workflows.
- Engineered responsive, user-centric interfaces and integrated them with RESTful APIs, reducing manual steps in internal operations.
- Contributed across the full software development lifecycle, including feature design, code reviews, debugging, testing, and deployment within a collaborative team environment.

Cantilever — Junior Developer

Mexico City | 2024 – 2025

- Delivered high-quality features for multidisciplinary projects under tight deadlines and structured code-review cycles.
- Built and maintained frontend modules using Vue.js and Nuxt, ensuring consistency with design specifications and UX requirements.
- Applied Git best practices and operated remote servers via SSH to support reliable continuous-delivery workflows.

Teleurban — Programming Intern

Mexico City | 2023 – 2024

- Developed and maintained cross-platform applications supporting internal operations and external business clients.
- Implemented backend services and data-processing components using Python, C#, Java, and PHP.
- Collaborated with senior engineers to translate business requirements into reliable, maintainable technical solutions.

EDUCATION

B.Sc. in Computer Systems Engineering — Escuela Superior de Cómputo (ESCOM), IPN 2018 – 2024

PUBLICATIONS & RESEARCH

Bachelor's Thesis — Pattern Recognition System for Lost-Dog Rescue

2024

Designed a pattern-recognition system to support the rescue of lost dogs; research presented at *HCI International 2025* and published in the *International Journal of Human-Computer Interaction*.
