PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience building and modernizing production systems across fintech, payments, SaaS, and government environments. Experienced leading modernization initiatives across 4 production fintech platforms and delivering systems that handle real financial transactions, from requirements gathering and architecture through security, certification, and production deployment. Successfully transitioned from a consulting engagement to a direct-hire position after leading client-facing delivery at IFD Technologies. Academic background from ESCOM-IPN with a peer-reviewed publication at HCI International 2025. Bilingual Spanish/English (C1), experienced collaborating directly with clients and distributed international teams.

EDUCATION

B.Sc. in Computer Systems Engineering

Escuela Superior de Cómputo (ESCOM), Instituto Politécnico Nacional (IPN) · 2018 - 2024

Academic Publication: Co-author of a peer-reviewed paper presented at HCI International 2025, published in the International Journal of Human-Computer Interaction.

TECHNICAL SKILLS

Frontend: React.js, Angular, Vue.js, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, TailwindCSS

Mobile: .NET MAUI, XAML, MVVM, Android, iOS

Backend & APIs: ASP.NET Core, .NET, Node.js, Laravel (PHP), Python, Java, C#, REST APIs, GraphQL

State Management: Vuex, Pinia

UI & Architecture: PrimeNG, Design Systems, Component Libraries, Responsive Design

Databases: Azure SQL, SQL Server, MySQL

Cloud & DevOps: Microsoft Azure, AWS, Docker, Git, GitHub, CI/CD, Linux

Security: RSA/AES Encryption, Digital Signatures, Azure Key Vault, Managed Identity

Testing & Practices: Jest, Agile, Scrum, Code Review, Continuous Delivery

Languages: Spanish (Native), English (C1 - Advanced)

DOMAINS

Fintech · Payments · SaaS · Government Systems · Enterprise Applications

PROFESSIONAL EXPERIENCE

Full-Stack Engineer · OM Payments / Grupo Cumulus

Mexico City | Apr 2026 - Present

Hired directly from client engagement at IFD Technologies

- Owned the end-to-end implementation of a production SPEI transfer platform, spanning the customer-facing mobile application, .NET backend, banking provider integration, security architecture, certification, and production deployment for a system processing real customer funds.
- Implemented the banking integration across 7 certification blocks and 13 technical specifications, covering 24 integration endpoints and 3 automated certification test cases required to enable production SPEI transfers.
- Built secure payment processing using .NET 10, Azure SQL, Azure Key Vault, Managed Identity, RSA/AES encryption, and digital signatures, including asynchronous processing, retries, reconciliation, and explicit handling of successful, rejected, and unconfirmed transactions.
- Developed the customer-facing SPEI experience in .NET MAUI for Android and iOS, including recipient onboarding, CLABE/RFC validation, transfer limits and fees, biometric authorization, transfer receipts, and reusable UI components.
- Implemented reliability safeguards for financial operations, including duplicate-transfer prevention and global exception handling across Android, iOS, and managed layers with Application Insights instrumentation.
- Led modernization across 4 production fintech platforms, standardizing reusable components, design tokens, responsive layouts, and loading/error patterns across web, desktop, and mobile applications.

Stack: .NET 10, ASP.NET Core, .NET MAUI, C#, XAML/MVVM, Angular 19, TypeScript, Azure SQL, SQL Server, Dapper, Azure Key Vault, Managed Identity, BouncyCastle, Serilog, Application Insights, SCSS, PrimeNG

Full-Stack Engineer · IFD Technologies Inc.

Remote | Oct 2025 - Apr 2026

- Owned a client engagement end-to-end as the sole engineer, from initial requirements and architecture through weekly client reviews, feedback cycles, and production deployment.
- Delivered projects across 5 simultaneous client accounts, adapting implementations to changing business priorities and tight delivery timelines.
- Participated directly in client kickoffs, sprint reviews, roadmap discussions, and feature-scoping sessions, translating technical decisions into clear business outcomes.

Stack: React, TailwindCSS, Laravel, REST APIs, GraphQL, Docker, AWS

Software Engineer · Cantilever

Mexico City | Apr 2024 - Oct 2025

- Introduced unit testing (Jest) into a legacy Vue 2 codebase beyond LTS support, improving reliability for utility billing and meter-reading workflows.
- Developed and maintained frontend features supporting operational systems used by Mexico's national electric utility (CFE).
- Delivered software under strict public-sector procurement deadlines while maintaining application stability and data integrity.
- Co-authored ICE Management 2.0, officially registered with INDAUTOR - Reg. No. 03-2025-112411030100-01.

Stack: Vue.js, Nuxt, Vuex, GraphQL, Docker, AWS, Jest

Junior Developer · Teleurban

Mexico City | Jul 2022 - Apr 2024

- Developed and maintained internal business applications supporting operational processes across multiple departments.
- Implemented new features, bug fixes, and system enhancements in collaboration with senior engineers.
- Worked with multiple backend technologies including Python, Java, C#, and PHP in production environments.

Stack: Python, Java, C#, PHP

PROJECTS & PORTFOLIO

Full-stack inventory and logistics management system featuring responsive UI/UX and modern application architecture, plus additional engineering projects.

luis-sosa-portfolio.vercel.app

SELECTED ACHIEVEMENTS

- Built and deployed a production SPEI banking integration processing real customer funds - covering 7 certification blocks, 13 technical specifications, and 24 integration endpoints.
- Led modernization across 4 production fintech platforms, standardizing reusable components and responsive experiences across web, desktop, and mobile.
- Transitioned from consulting engagement to direct-hire after independently owning client delivery at IFD Technologies.
- Co-author of ICE Management 2.0, officially registered with INDAUTOR - Reg. No. 03-2025-112411030100-01.
- Co-author of a peer-reviewed publication at HCI International 2025 - International Journal of Human-Computer Interaction - Computer Vision System for Missing Pet Identification.
